SUPPLEMENT TO
REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF THE ESPIONAGE ACT 50 U.S.C. 31 AND 32. AS AMENDED, ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. The Osijek foundry and factory for farming equipment manufactures the following equipment:

- Ploughs, domestic model Vila-3
- Grinders for grain and straw
- Thrashers
- Sowers
- Potato sowers (which dig furrows and sow the crop)
- Tractor sowers
- Tractor cultivators
- Fertilizer spreaders
- Turnip sowers
- Corn sowers
- Combination grain sower (which sows grain and scatters fertilizer)
- Motorised grinders
- Grain sowers with tin boxes
- Attachable forks for hay
- Universal tractor cultivators
- Diesel motors to operate farm machinery
- All types of farm hand tools

2. Although, [redacted] the above equipment is mass-produced, only the prototypes for most of the equipment have been produced so far. The raw materials are obtained from the domestic market, and the finished products are for distribution in Yugoslavia.

3. In addition to mass production of farming equipment, the factory also produces special machinery and industrial equipment. In the early part of 1949 a large new machine for an oil factory and equipment for the nicotine factory in Skoplje were constructed. Barometer condensers for sugar factories, certain machine parts for the electric power stations in Osijek and Rijeka were also manufactured. Reportedly, a special section was started in November 1949 for the production of hand grenades.

4. The General Directorate for Agriculture, under the Yugoslav Ministry of Heavy Industry, Belgrade, is in charge of the administrative and operational management of the factory. Engineer Vasilije Zaharcevic is chief of the foundry, and Antun Jelic, Leopold Kos, Viktor Beslic and Antun Vesic are

all specialists in the foundry; Milan Adamovic is a technician in the construction bureau, and Pervanje, also a technician, is the original designer of the potato sowing machine.

5. Through the use of forced labor, the factory output was stepped up to such an extent in 1949 that mass production of 200 ploughs daily was achieved. Machinery, with the exception of that installed before the war, was obtained from the Prvomaj factory.
6. The following workshops are fully equipped: foundry, turning shop, section for enameling, section for mounting, section producing agricultural machinery, construction and locksmith shop, and other auxiliary sections.
